CROSSFIELD

Good News for the Taxpayer

At the last meeting of the Crossfield School Board, final consideration was given to the tax roll and it was decided that owing to the lessened expenditure for the next year, it would be possible to reduce the assessment of the farm portion of the district 25 per cent. The village portion was raised 21 per cent by the recent assessment.

In order to equalize the assessment it will be necessary to make a rate of 13 mills in the village and 10 mills in the farm portion. This will make a total assessment of \$4422.96 in the village and \$2998.64 in the country, which is giving the farm portion a small advantage over former years, being a reduction of \$700.72 in the country and an increase in the village of \$49.83.

Mr. W. McRory Resigns

Secretary-Treasurer of the Village for More Than Twenty Years

T. Tredaway, Acting Secretary-Treas.

It will come as a surprise to many to learn of the resignation of Mr. W. McRory as secretary-treasurer of the Village of Crossfield.

To those in close touch with him, though, this is not surprising, for they are aware that Mr. McRory has been poorly for some time; and they know that, but for his aggressive, unyielding spirit, he could well have resigned some time earlier; but he is one of the race of men who never give in till there is some hope of filling the gap. Mr. McRory came here from Souris, Manitoba in 1911, going into the hardware business. In January 1912 he was appointed secretary of the Village, and became secretary of the Municipality as well, five years later, in 1917. He has therefore, been secretary-treasurer for twenty years and eight months, which is a considerable portion of a man's active life-time.

To say that he has been an efficient and excellent public servant is no exaggeration. He has been more than that. Many of the past Councils have relied solely on Mr. McRory's advice to conduct the affairs of the Village, and his advice has always been right.

It is with regret that the ratepayers of Crossfield accept his resignation, and it is the sincere wishes of one and all that a rest from his labors, will afford Mr. McRory the mental relief which is so essential to one's physical well-being and make-up.

Mr. McRory's greatest hobby has been his garden, and it has become almost proverbial for anyone visiting Crossfield to go and see the flowers at McRory's, his particular pride being the peonies he grows.

Mr. Thomas Tredaway has been appointed acting secretary-treasurer of the Village, and the office equipment will be moved this week from the M. D. of Rosebud office into the Town Hall.

Harvesting Is General

A considerable amount of rain fell in the district Friday night which delayed cutting during the week-end. With ideal weather, cutting was resumed east of town on Tuesday morning and the fields are becoming dotted with stacks. Wheat of town barley and rye is now being cut. All harvesting operations will be in full swing by the end of the week.

It is expected that in many cases wheat will run from 25 to 40 bushels to the acre, with a good average throughout the district.

Get Ready for School

A Keystone Drawing Portfolio will be given away with every one dollar purchase of school supplies at the Chronicle office.

Word has been received that Rev. A. D. Gurrie arrived in Scotland on Thursday the 18th.

SCHOOL FAIR SEPTEMBER 8th.

The School Fair will be held in the Fair Grounds on Thursday, September 8th. When it is hoped the weather will be fine to enable every boy and girl to bring their exhibits and show their parents that they are not only a credit to their home but also to the community in which they live.

It is unfortunate the Fair comes right in the midst of a bountiful harvest in the Crossfield district and everybody will be busy garnering their crops, but nevertheless don't let us forget our children who gain a lot of experience by attending and exhibiting at the School Fair.

NOTE

Following are classes that are deleted from the Bulletin:

Class 3—Pansies
Class 5—Mangels
Class 13—Vase of Stocks
Classes 18 and 27 only and not 18 to 27 as mentioned in Supplement to Bulletin. The supervisor of School Fairs has written to the secretary and all teachers pointing out the error made.

School Commences September 1st

Crossfield high and public schools will re-open for the fall term on September 1st. All high school students should report promptly to facilitate arrangements of a timetable to enable them to take the units they require.

OBITUARY

Private funeral services for the late Mrs. Bertha Soper (nee Turnbull) aged 34 years, who died after a lengthy illness at Keith Sanatorium, were held on Monday afternoon from Leyden and Bruce Funeral Home. Rev. J. M. Roe officiating. Burial was made in the Burnside cemetery, Calgary.

Tea and Sale of Home Cooking Saturday, August 27th.

A tea and sale of home cooking will be held by the Women's Guild in the store adjoining Halliday's on Saturday Aug. 27th. Your presence will be much appreciated.

Anglican Church Picnic

Wednesday, August 31

The Sunday School and Congregational Picnic of the Anglican Church will be held in the Crossfield Park on Wednesday afternoon August 31. Ladies please bring refreshments.

Calgary Baseball Team To Play

Here on Sunday, August 28

The Calgary Maple Leaf senior baseball team will play here on Sunday afternoon against the Crossfield Intermediate team captained by Ronnie McFadyen.

The Crossfield boys are playing snappy ball and a good game is looked for. The game will start at 3:00 o'clock sharp.

WORLD HAPPENINGS BRIEFLY TOLD

The will of the late King C. Gillette, safety razor manufacturer, naming his widow as the sole beneficiary was probated at Los Angeles. Attorneys said the estate would be in excess of \$1,000,000.

Believed to be the last survivor of the sixth Regiment, which took part in the Riel Rebellion at Cut Knife Creek and Fish Creek in 1885, Sergeant-Major Usebe Beaudoin, 66, is dead at Lachine, Que.

Two thousand five hundred dollars for an individual prize for the best sample of wheat shown at the World's Grain Exhibition next year at Regina, is the largest of its kind ever offered.

Final payment to farmers for all wheat pooled during the 1931-32 season has been made by the Dominion Bureau of Statistics issued by the R. D. Purdy, general manager. Total payment amounted approximately to \$200,000.

Automobiles on farms in Canada have doubled in the past 10 years and there is now a car for every 227 farms, figures issued by the Dominion Bureau of Statistics show. There are 726,623 farms in the Dominion and on them 321,506 automobiles.

There are 5,951,411 single persons in Canada and 3,971,198 married, it is revealed in census figures on conjugal conditions released by the Dominion Bureau of Statistics. Of the population of 10,376,786, males number 5,374,451 and females 5,002,245.

Preserving Fish By Brine-Freezing Method

Process Used In Scotland Has Been Gratifying Success

Brine-freezing, a new method of preserving fish caught in the sea, the result of research work carried out at the Torry Research Station, Aberdeen, is regarded as a gratifying success and an exhibition of cod, sole, halibut, plaice and rock salmon frozen by this process was given recently at the Department of Scientific and Industrial Research, London.

The fish had been caught by the research vessel "City of Edinburgh" weeks previously. Some of them were fried at the department and guests enjoyed an early lunch of fried fish at the government's expense.

This new process will, it is claimed, revolutionize the methods of preserving fish. Trawlers will brine-freeze fish as they are caught instead of, as at present, storing them in ice while the trawler is at sea. A. Lumley, superintendent of the Torry Station, said that one of the disadvantages of fish frozen under old methods had been that it was not ultimately nice to eat.

In the brine-freezing process the fish are dipped into a solution of sodium chloride (or brine) carried on board in a tank at a temperature of five degrees Fahrenheit. Then they are stored at a temperature of five degrees, and experiments have shown that fish so treated can be kept in perfect condition for three months.

The cost of installing the new plant on board is about \$8,500, but it is claimed there would be a real saving, because of the avoidance of loss on fish caught early in the voyage. A Billingsdale fish merchant says the brine-frozen fish was almost as good as freshly caught fish.

Lacked Vision

Hotel Proprietor—"Now, over there is the sea."

Copy Writer—"Where? I can't see it."

Hotel Proprietor—"You can't." My dear sir, I'm afraid you're not the man we want to write our advertisements."

Another Scotchman died as a result of a broken heart in Edinburgh last week. It seems that his doctor insisted that he give up smoking just after he had had his cigarette lighter refilled.

"What would you like, sir?"
"One lemonade—and three straws."
—Buen Humor, Madrid.

An Important Industry

Demand For Lobsters From Canadian Waters Is Growing

The lowly lobster has climbed to a high place of importance among Canadian industries and offers one of the brightest spots on the Dominion's business horizon, according to a bulletin just released by the Department of Immigration and Colonization of the Canadian Pacific Railway.

"Both in the United States and Great Britain, demand for lobsters from Canadian waters has been growing and the industry is in a healthy state," the bulletin stated. "Lobsters now rate second only to salmon as the most important fishing enterprise in Canada, the salmon industry being centered largely in British Columbia and the lobsters coming chiefly from the Atlantic coast near Halifax, N.S."

The bulletin told of a new record for a single shipment of canned lobsters which recently was made to Great Britain. The shipment contained 10,000 cases and was valued at \$200,000.

Novel Use For Planes

Japanese Army Machines Search For Active Volcano

Japanese army planes were put to the novel use of scouting for an active volcano. Reports came to Harbin that an extinct volcano in the Hinggan range to the west had suddenly become active. Rumbles were reported as heard in a place 25 miles away from Harbin. The planes failed to locate any evidence of eruption. Russian scientists reported 13 volcanoes in the Hinggan range back in the 18th century.

Eliminating Noise

Milk Concern In New York Is Doing Its Bit

A large milk concern serving New York City has actively entered upon a noise abatement campaign. By equipping its horses with rubber cushions for their shoes, and providing its drivers' milk bottle baskets with rubber shock-absorbers, it plans to lessen the din of early morning milk deliveries.

A necropolis is a burial ground, usually of great size, or one found near the site of an ancient city.

NEW DEEP WATER ROUTE FOR WESTERN WHEAT
Most fittingly, the vital new link in the Great Lakes' system, Canada's \$128,000,000 new Welland Canal, was opened, officially, by sending the greatest grain-carrier afloat, S.S. Lemoyne of Canada Steamship Lines, through the eight locks to Kingston with the biggest cargo of western wheat moved

A Big Cargo

Lake Vessel Carries Enough Wheat To Bake 12,350,000 Loaves

An old salt sat on the bank of the new Welland Canal. Beside him sat the statistician. Talk veered uncertainly from one subject to another. Then it reached record cargoes. "And the statistician got busy."

When the "Lemoyne" opened the canal, she carried the world's greatest cargo of grain, he said. "She has already carried 571,885 bushels of wheat at one load, and that cargo would make 12,350,000 two-pound loaves of bread. If you laid those loaves end to end they would reach 2,350 miles for the distance from the spot where the wheat was produced to the sea. It would take 210 farms of 10 acres to grow the cargo and 286,000-ton railroad cars, or a train 2 1/2 miles long to carry it."

"Well," said the old salt, tapping his pipe reflectively against the snubbing post, "that's quite a load. I remember when the first steamboat, 'Theerin'—pulled out of Port Arthur with her record cargo. It was 30,000 bushels."

Britain Perfects Super-Tanks

Much Stronger and More Efficient Than Old Type

Great Britain was the first nation to use "tanks" in warfare. Since then these instruments of destruction have been greatly improved so that England leads the world in such weapons. The latest tanks are covered with armour plate much stronger than before and capable of resisting even the new German super-bullet, which blasts its way through the armour of the old-type tanks. They have also perfected a more mobile light tank capable of negotiating ditches, streams, trenches and other gaps much wider than its predecessors could have negotiated.

What It Stood For

A tiny butcher shop recently opened in a Connecticut town; wedged into a small store room, bears the impressive firm name of Williams & Gilchrist, Ltd. Asked what the Ltd. stood for, "Stand for 'Limited,'" Mr. Gilchrist said. "You see, we're limited to meats and nothing but meats."

"What is a paradox, sister?"
"Two wharfs side by side, sir."

Utilize White Whales

Hides May Be Used For Manufacture Of Heavy Leather Goods

The two white whales brought to Winnipeg from Hudson Bay by the Industrial Development Board of Manitoba have been rendered at the St. Boniface abattoirs and they provided 36 per cent. of their total weight in excellent quality oil, bearing a slight odor, and being only slightly stronger than olive oil. The board hopes to develop a new industry on the northern water body.

The hides are now in process of tanning which will take some time, but leather workers believe it will prove suitable for the manufacture of ladies' handbags, and other fancy leather goods. Minute study of the outer skin reveals a mottled effect with alternating patches of smooth and rough skin. Blubber almost two inches thick adheres to the hide, but comes off readily.

A Token Of Gratitude

German Soldier Pays Tribute To Humanity Of American Doughboy

A little silver coin bracelet to commemorate the humanity of an unknown "doughboy" who saved the life of his enemy was recently deposited in America's war museum at West Point.

August Ullrich, late of the Kaiser's armies, sent the trinket from his death-bed and with it this note:

"Before I will have to depart, I intend to fulfill the promise I gave to a soldier of the American army, who saved my life in 1918. 'I therefore lay in your hands a bracelet made out of old German coins as a sign of appreciation for the action whose soldiers even in war treated their enemies with great consideration.'"

Artificial Lighting For Office Buildings

Would Provide Uniform Glow Which Is Easier On Eye

Some authorities on illumination contend that the office buildings of the future will be built without windows and will employ artificial ventilation, also artificial lighting throughout, in an effort to secure a uniform glow which will not tire the eyes. An instrument has been invented which tests accurately the effect of various lights on the eyes.

SUNDAY SCHOOL LESSON

AUGUST 28

GIFTS FOR BUILDING THE TABERNACLE

Golden Text: "Honor Jehovah with thy substance, and with the first-fruits of all thine increase." — Proverbs 3:5.
Lesson: Exodus 35:4 to 35:7.
Devotional Reading: Psalm 84:1, 2, 8-12.

Explanations and Comments

The Call For Contributions For the Sanctuary, Exodus 35:3-30.—Moses assembled the people and addressed them, probably from a raised platform. He reminded them that it was God's desire to have a sanctuary where He might meet them and they might offer Him their worship. He called for voluntary contributions of materials and labor for the sanctuary and its equipment and for the vessels of the priests. There was one restriction; the givers of gifts must be "willing-hearted," and the laborers "wise-hearted." The people listened and quietly went back to their tents.

"You might have wondered whether they would return, since so little had been said to touch their emotions as to arouse their enthusiasm. How different this seems to the methods in use today to extract money from reluctant contributors."

"An Old Subscription List," verses 21-26.—This heading is the happy title which Dr. Alexander MacLaren gives to his exposition of this chapter. Let each man do according as he hath prospered in his heart," wrote Paul to the Corinthians; "not grudgingly or of necessity, for God loveth a cheerful giver." The men and women on this old subscription list fulfilled that injunction of Paul's.

They came—a great crowd of willing givers, "every one whose heart stirred him up, and every one whom his spirit made willing," laden with gifts needed for the building of God's house and for "the holy garments," the garments consecrated for use in the sanctuary.

"The world asks, 'How much does he give?' Christ asks, 'Why does he give?'" —John R. Mott.
They were refugees. They were living in the wilderness, where there were no stores or workshops. Materials for the tabernacle must come from their private hoards. From Exodus 12:35, 36 we learn that the children of Israel on leaving Egypt asked of the Egyptians "jewels of silver and jewels of gold, and raiment; and Jehovah gave the people favor in sight of the Egyptians, so that they let them have what they asked. And they deplored the Egyptians." These treasures now the people poured out for Jehovah's use. Every gift was a sacrifice. It could not be replaced.

There are 121 languages spoken by the 461,000,000 inhabitants of Europe.

Vast Wool Trade

Two-Thirds Of The World's Wool Produced In British Empire

Nearly one-half of the world's raw wool, a survey by the Empire Marketing Board shows, and more than two-thirds of the wool entering world trade is produced within the British Empire.

Concerning Canadian production, the survey, a portly volume of 200 pages, says that appreciable progress has been made since 1914, though the high point reached just after the war has not since been attained. The sheep population is increasing steadily, and there is no reason to doubt a slow upward trend in wool production. Quebec and Ontario together are responsible for about one-half the Canadian clip, but their share has been gradually diminishing, with that of the western provinces increasing. The sheep population of the world is estimated at nearly 800,000,000, of which about one-third are in the Empire.

Recipes For This Week

(By Betty Barclay)

PIN WHEEL BISCUITS

- 2 cups special cake flour, sifted.
- 4 teaspoons baking powder.
- 1/4 teaspoon salt.
- 4 tablespoons butter or other shortening.
- 1/4 cup milk.
- 4 tablespoons butter, creamed.
- 1/4 cup brown sugar.
- 1/4 cup pecan meats, chopped.
- Sift four once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Roll 1/4 inch thick on slightly floured board. Spread with creamed butter; sprinkle with brown sugar and nuts. Bake on jelly roll and cut in 1-inch pieces. Place in greased muffin pan cut-sides up. Bake in moderate oven (375 degrees Fahrenheit) 30 minutes. Makes 12 biscuits.

ORANGE BLANCO MANGE

(Serves 6-8)

- 1 1/2 cups evaporated milk.
- 1/2 cup sugar.
- 1/4 teaspoon salt.
- 4 tablespoons cornstarch.
- 1 1/2 cups orange juice.
- 1 teaspoon grated orange rind.
- Heat milk in double boiler. Mix sugar, salt and cornstarch. Blend with part of orange juice. Add with remaining juice to hot milk. Add grated rind. Cook until smooth, stirring frequently. If orange juice curdles milk, beat with whirl top beater. Pour into individual serving dishes and chill. If desired to mold, increase cornstarch 1 tablespoon.

Settlement Plan

Saskatchewan Families Taking Advantage Of Government Scheme

Out of 507 families approved for the Saskatchewan Government land settlement scheme a total of 318 had actually gone to farms up to August 6, according to a statement issued recently.

Further classification of this number showed that 123 families had taken up residence on purchased land and 193 on homesteaded lands.

Figures for the cities were: Regina, number approved 136, actually gone 58; Saskatoon, number approved 298, actually gone 172; Moose Jaw, number approved 73, actually gone 58.

Origin of other families included in the settlement movement were: Arco, 1; Yorkton, 1; Estevan, 10; Cupar, 1; Indian Head, 1; Edenwold, 1; Vonda, 1; Rutherford, 4; Weyburn, 8; Gravelburg, 1.

Trials Of A Newspaper

The following item appeared in The Journal, Bates County, Georgia: "We done a good business Saturday, June 4th type that cost 50, put in \$60 worth of new type and collected \$1 subscription. We tried 'em on corn last week, but had little success. This week we call for peanuts on subscription. This is as far as we are going. Don't want any hickory nuts."

An unwelcome guest is one of the best things going.

"Can't you give up drinking for my sake?"
"Who said I drank for your sake?"
—All for Alla, Stockholm.

Photos show: top left: Rt. Hon. Stanley Bruce, of Australia; Rt. Hon. Stanley Baldwin; His Excellency, Earl Bessborough, and Rt. Hon. R. B. Bennett with two members of the Indian delegation at the canal ceremonies. Left centre: the giant 633-foot S.S. Lemoyne passing under one of the canal 120-foot electric lift bridges. Right centre: marking the inauguration of a new eastern deep-water terminus for grain at Kingston and the fact that only 200 miles of river navigation now remains to reach the export port of Montreal.—Mayor G. C. Wright of Kingston, conferring the freedom of the city on W. H. Coveney, president of Canada Steamship Lines aboard freighter on arrival. Bottom: "The practical consummation" of the ceremonies.—S.S. Lemoyne prepares to unload her cargo of 332,000 bushels, shipped by James Richardson & Sons, of Winnipeg, at Kingston's new elevator which has already, for 1932, handled 4,000,000 more bushels than it did in the whole of the preceding year.—All photographs by Canada Steamship Lines.

Wheat Situation

Many Factors Leading To Accumulation Of Heavy World Surplus

The marketing of this year's wheat crop, which is unofficially estimated at from 400 to 450 million bushels, will present a problem of large proportions. In addition to this year's crop there is a carryover of more than 100 million bushels from last year. This is a reduction from the stocks on hand in Canada a year ago, but world stocks, estimated as at July 1st by the U.S. Department of Agriculture at 640 million bushels against 656 million bushels in 1931, are heavy. Argentine and Australian supplies, as well as Canadian, are smaller than last year, but these decreases are partially offset by an increase of 40 million bushels in the United States.

Conditions in the United States have been unfavourable in the winter wheat area and the outlook of this crop was practically approximate at 432 million bushels as at July 1st, against 789 million bushels in 1931, and a five-year average of 549 million bushels. Acres sown to spring wheat were increased over 1931 and the outlook for this crop is much better. The indicated production of all wheat is placed at 737 million bushels against 894 million bushels last year and a five-year average of 829 million bushels. Domestic requirements practically approximate the total wheat crop. Exports from the United States since 1900 have never failed to exceed 125 million bushels a year. These conditions suggest a substantial reduction in United States stocks during the coming crop year.

Crop conditions in Western Europe have been favourable, but unfavourable in the Danube Basin. The total acreage sown to wheat is somewhat less, but for the whole of Europe harvests are expected to be about the same as last year. While wheat production in France, Germany, Spain, Belgium and Holland is estimated at 657 million bushels as compared with 580 million bushels in 1931, the crops in Roumania, Hungary, Bulgaria and Yugoslavia are unofficially placed at 245 million bushels against 364 million bushels a year ago. Unfavourable weather has since been reported in Italy and France, but the outlook will be large. The wheat crop in the United Kingdom is officially placed as below average. In Russia, sowings of winter wheat were larger than in 1930-31, but spring operations were beset with difficulty and the total area sown is estimated at 6 million acres less than last season. Production is expected to be about 1,000 million bushels. Home consumption of white bread is being encouraged and it is said that it is unlikely that Russia will be able to increase wheat exports. Shipments during the current season to July 23rd have amounted to 71 million bushels as compared with 91 million bushels to the corresponding date last year.

Persisting surplus has characterized the world wheat situation during the past four years. Available supplies have continuously exceeded annual requirements, even after large diversions into lower price outlets, such as increased use as animal feed, heavier consumption in the United States and greater exports to China. Imports by China in 1931, amounting to 50 million bushels, were the largest on record—eight times greater than in 1920, and four times those of 1929. Canada supplied 15 per cent. of China's imports, United States 18 per cent., and Australia 65 per cent. The bumper wheat crop of 1928 was mainly responsible for the emergence of these huge surplus supplies. Economic depression since 1929 has contributed to the persistence of the problem, but widespread foreign restrictions upon imports have been the major influence tending to hold down total consumption. Russian exports, the outcome of the Soviet policy, have been important during the past two years. Measures of other nations have caused contraction of consumption or restrained its expansion, stimulated home production and increased the burden of the surplus. Since the solu-

tion of the problem of wheat surplus seems to be dependent upon increased consumption rather than upon a general decrease in production, the desired balance may have to await a restoration of a more normal state of international trade.—Donald M. Marvin in Royal Bank of Canada News Leader.

Slavery Still Exists

Great Britain Taking The Lead To Stamp Out This Evil

The popular idea is that there is little or no slavery left in the world in these days. Most people imagine that slavery was abolished many years ago. But that is quite a fallacy, and the fact that 100 years have passed away since slavery was abolished in the British Dominions prompts reflection upon the immense task that remains to be overtaken before slavery is stamped out all over the world and no man or woman be in physical thralldom to another.

A recent decision of the League of Nations to pursue a relentless campaign against the continuance of slavery anywhere in the world is said to involve the ultimate freeing of 5,000,000 slaves. Sir Arnold Hodson, Governor of Sierra Leone, has declared that slave raiding is as horrible today as it ever was. Missionaries tell of practices that accompany the owning of slaves in some parts of the world, notably the interior of Africa, which include "torturing to death," boiling oil being poured down slaves' throats," and "branding them with red hot irons." Slavery in various forms exists today in China, Arabia, Liberia and Abyssinia. In China especially there is hope that public opinion will bring about the abolition of the practice of the owning of slave girls. But there is a great deal of effort needed before present-day slavery is utterly abolished. In some cases slavery is embedded in the customs of the countries implicated, and century-old conservatism will need to be overcome—no light task.

It is encouraging to know that Great Britain has taken the lead in the effort to stamp out this evil, an evil so obnoxious that it cannot be contemplated with anything but repugnance by any modern civilized person. Forty nations have agreed to join hands in the effort. Surely every man or woman with influence in the world at all will enlist that influence in the noble cause and the voice of popular approval be heard on behalf of the laborers of those who strive to uproot this age-old reproach on humanity.—Regina Leader-Post.

Proposal To Divert Northern River Waters

Channel Of Ogoki River In Ontario May Be Changed

The proposal to divert the waters of the Ogoki River from their natural channel leading to the sea at James Bay into another route which will lead them to the Great Lakes by way of the Nipigon River has, because of its unusual and spectacular nature, received much public attention in the past few days.

There has been much comment on the additional horse-power that will be provided, the total being estimated at some 200,000. The horse-power thus to be made available is not, however, at the present time an important item because there is no pressing need in that direction. Northern Ontario has so much potential electric power now undeveloped that a little more or less makes no difference. The diversion and addition of 4,000 cubic feet per second to the waters of the Great Lakes will be important because of its effect in maintaining levels which would be in danger by the deepening of channels which at once means heavier outflow.

Carrier Pigeon Aids Police

Releasing a pigeon from an aeroplane, policemen of Frankfurt-on-Main, Germany, for the first time located the neighborhood of a blackmailer who had demanded a large sum from a member of the consular service. The pigeon had been sent in a box with a blackmailing note so that it could carry back the money. On the return of the pigeon the blackmailer wrote the consul a threatening letter. He was traced definitely by it, and now is serving a term in prison.

An instrument has been invented that measures to the 0.000,000th of an inch it should be useful to a motorist trying to find a place to park his car.

"In San Marino, oldest and smallest republic in the world, no clock strikes more than six consecutive times, due to the fact that the day is divided into four parts of six hours each.

FAMILY TO ATTEMPT OCEAN HOP

The "flying family" of Hutchinsons in front of their new twin-motored Sikorsky amphibian plane, in which they will shortly attempt to fly the Atlantic. Col. George Hutchinson with his wife and two daughters, Kathryn, eight, and Janet, six, will take off from Washington with London as their destination. They plan to stop at Labrador and Greenland and will be accompanied by a radio operator and a co-pilot.

The Mystery Of Stonehenge

Scientists Fail To Throw Any Light On Its Origin

The ghosts who inhabit Stonehenge must have chuckled in their transparent—or whatever it is a ghost wears to keep out the cold—as they listened to 100 of the world's leading archaeologists wrangle over the origin of the strange monument of monoliths that rears itself in the centre of Salisbury Plain. The day formed the climax of an international congress of scientists, and the theme was one that provoked violent argument. But to no avail. As one eminent German put it at sunset: "All our evidence is insufficient."

So Stonehenge joins the Sphinx, the Stone Men of Java and a few other ageless marvels concerning whose origin man has no actual knowledge. Druids may have sacrificed upon its huge horizontal stone; gobins of the English forests who peered from its undergrowth when Rome was young may have used it as a meeting-place; but who built it, when and why—these questions remain among the eternal riddles of time. But that will not prevent the scientific gentlemen from continuing to conjecture. Indeed, they will regard Stonehenge with more favor now than ever, since it is something about which they can always argue—and never agree.—Montreal Star.

Upheld His Reputation

Old Horse Kept Idea Of Economy To

An old fire horse, Sandy, demoted to pulling the garbage wagon in Evanston, Illinois, when the department was motorized, lived up to his reputation to the last. During his 30 years of service, Sandy seldom ate more than a pint of oats and one forkful of hay. When his old age and feebleness made him too much of a burden he was taken out to be shot—but saved the city a bullet by dropping dead at the incinerator.

Explorer: "From the Chinese frontier we pushed into Tibet."
Sympathetic Lady: "We had a car like that."

Not Afraid Of Work

Ninety-Year-Old Winnipeg Woman Deplores Being Idle

"Isn't it awful that I have no work to do," is the plaint of Mrs. Christian McMillan, who celebrated her 90th birthday in the spring.

Mrs. McMillan came to Winnipeg with her husband in 1885 from Waterville, N.S., and since then nearly 5,000,000 yards of yarn have passed through her fingers as she plied her spinning wheel. In the summer months of the year she still spins, making the yarn she knits into gloves and mittens for her family.

In her early days Mrs. McMillan did weaving as well as spinning, using her own-made wool to fashion family blankets and even the material from which the men's suits were made. But now she who has covered nearly 3,000 yarn miles, looks deprecatingly at the gloves she is making and says: "This isn't work; this is only passing the time."

Fully Certified

Frenchman Has Various Papers To Prove His Legal Entity

One of the things that the French find most difficult to understand about ourselves—indeed, they never quite do—is that we can go through life without any "papers." From birth to the grave a Frenchman is docketed; starting with entry in his father's "carnet de famille," at the age of 18 he gets a "carnet militaire," to be followed by a "carte d'identité." When married he himself receives a "carnet de famille"; and these various papers he must keep religiously or risk, in extreme cases, losing his legal entity. He can, if he likes, get a "carte d'identité," and in any case, accustomed to carry three or four documents having the same effect and certified by the police.—London Saturday Review.

With a view to lessening the early morning noise of rattling milk bottles, a rubber company has devised rubber-covered milk carriers.

Agricultural workers in Cuba are being paid from \$200 to \$400 a year.

Scientists Get Thrills

Father Hubbard and Party Explore Active Crater Bed

After conquering Alnahkah, the largest active crater in the world with its circumference of 21 miles and a drop of 3,000 feet from rim to floor, to return with an official record of the highest crater bed temperature known to man, Rev. Father Bernard H. Hubbard, S.J., Glendier priest of Santa Clara University, arrived recently in Victoria after five months of scientific exploration packed with thrills and interest. With him were Professor Rod Chisholm, cartographer of San Francisco University, and "Margo" and "Katsina" malamute dogs sharing their adventures.

Father Hubbard gave a summary of the remarkable results of the 1932 expedition from Santa Clara University of California, paying full tribute to Rev. Father Galtier, S.J., Rod Chisholm, Kenneth Chisholm, and Edgard Levin of his immediate party and others who had helped in the work.

Father Hubbard guided the Santa Clara party to the scene of its greatest success. Inside the crater, where 3,000 feet below its rim the party found temperatures high enough to melt tin, zinc and copper by reaching out a hole twelve inches deep in the bed of ashes. Copper has a melting point of 1,980 degrees centigrade. The party was successful in using a copper wire and a disc within a few minutes. Nearly issued blue vapors, indicating temperatures still higher, possibly over 2,000 degrees.

It was at Alnahkah that Father Hubbard showed his party the new fumarole which he had predicted in 1931 for this year. Three miles in extent, the fumarole stood yawning on the floor of the main crater, with its deadly ring of gases inside. Two hours were spent in exploring the fumarole, hours hung with menace from the poisonous fumes, the party taking exhibits and samples of sulphides and gases for analysis later.

While inside the crater the party had braved death many times from chloride, sulphur dioxide and other gases, while around them lay snow birds, trapped by the deadly fumes. One malamute became overcome and was rescued with nothing more serious than scorching pads to his feet. Due to the insulating bed of ashes, crater beds were passable, but a few inches below the surface temperatures as high as 600 degrees centigrade were common, while copper fusing was made at only one foot below ground.

More Automobiles On Canadian Farms

Statistics Show Number Has Doubled In Ten Years

Automobiles on farms in Canada have doubled in the past ten years and there is now a car for every 2.7 farms, figures issued by the Dominion Bureau of Statistics show. There are 726,623 farms in the Dominion and on them, 321,506 automobiles.

Ontario has more cars to the farm than any other province, with an average of one for every 1.53 farms, and Quebec has the smallest ratio, with one for every 5.106 farms. Saskatchewan ranks after Ontario, with one to 2.10; Manitoba, 2.12; Alberta, 2.25; British Columbia, 2.46; New Brunswick, 3.26; Prince Edward Island, 3.31; and Nova Scotia, 3.83.

The number of farms with tractors in Canada has increased from 43,578 in 1921 to 97,176 in 1931, an increase of 123 per cent. Similarly, the number of tractors has increased from 48,455 to 105,059 for an increase of 121.4 per cent. in the same period. There is one binder for every 1.69 farms, and one threshing machine for every 9.84 farms in Canada.

Printing Paper Money

Paper money is now printed from chromium surfaced plates. The design is first engraved on a steel plate, from which a negative is made by depositing electrically, first nickel, and then alternate layers of copper and nickel. This negative serves as a mold upon which an electrolytic printing plate is deposited. This plate is plated with chromium, and duplicates the original steel engraving.

Luke—My wife explored my pocket last night.
Mike—What did she get?
Luke—Same as any other explorer—enough material for a lecture.

Even in 2000 B.C. they used bath towels. This is borne out in findings in an Egyptian tomb by an expedition of the Metropolitan Museum of Art.

Waterproof rope, made by treatment of rubber, is being turned out by a process developed in England.

A New Market For Flax

Ireland May Get Supply From Canada Instead Of Russia

Canada may become a serious competitor with Russia in the sale of flax to Ireland, says the Hamilton Spectator. Lewis Gray, a member of the Northern Ireland delegation to the Economic Conference, visited the flax-growing district in Ontario to ascertain the possibilities of the Canadian product. Flax for fibre has been cultivated in Canada since the first days of New France. It is grown by the Doukhobors of the West, who learned the art of its cultivation and harvesting in Russia. It has been grown successfully in Nova Scotia and New Brunswick, has been shipped to Ireland from Quebec, and flax fibre seed sold in that country by Ontario. Most of the Canadian flax is grown in Western Ontario, hence the visit of Mr. Gray to that district. He addressed the growers there and from the discussions which will result Ireland and Canada may mutually benefit. The reason why flax has not been grown more extensively in this country is the number of processes required to prepare the fibre for spinning which makes the cost of labor high. The Russian peasant has here the advantage, perhaps, but if some flax can be sold to Ireland, it has been, it is hard to see why the trade cannot be extended. The quality of Canadian flax is good. Energy, initiative and good management on the part of the Ontario grower may enable him to compete successfully with the grower in Russia. Opportunity would seem to be knocking on the door of the Canadian flax-grower.

Fine Salvage Feat

Lone Diver Working On "Laurentic" Wreck Off Donagel Coast

Much admiration was expressed over the great feat of the Italian salvage crews in wresting many millions of dollars worth of bullion from the British liner, "Egypt," off the French coast, and another feat is being performed off the Donagel coast of Ireland by a lone diver, which is equally worthy of praise.

The White Star liner "Laurentic" was torpedoed by a German submarine in 1917, and sank in 120 feet of water. The British Admiralty, with all its equipment, salvaged twenty-five million dollars worth of gold, then gave up the job in 1918, leaving another million dollars below.

About one year ago a small syndicate of Londoners hired a tug more than sixty years old, a small crew and one diver. The water is always rough, there is a constant eddy at the bottom which has made the sand as hard as concrete, and it is only possible to stay down a few minutes at a time. The rough eddy shifts the wreckage, so that the diver has to grope about for his bearings a different way every descent. The preparatory work that has done one trip may be undone by the time he is able to go down again.

But recently he salvaged a gold ingot worth \$100,000. It is a hard struggle, but the reward is high.—St. Thomas Times-Journal.

Danger On Old Tires

"A blowout on the front tire of an old model coupe on the Kingston Road resulted in one person being killed and six injured. That is a not uncommon story. It is dangerous to go at high speed with wornout tires and it is difficult to go at other than high speed on the highways. Tires are cheaper and all motorists owe it to their passengers to make sure that they are in serviceable condition.

Making Processed Cheese

The annual "processed" cheese manufactured in Canada last year amounted to 12,049,012 pounds, of which 1,148,310 pounds were exported. There are eight firms now producing this type of cheese, of these six are in Ontario, one in Quebec, and one in Alberta. "Processed" cheese is made from ordinary Cheddar.—Department of Agriculture, Ottawa.

The New Television

This is a wonderful apparatus, you can see how your drafts for outstanding debts are going.—Lustige Blätter, Berlin.

Her: "Courtesy is the soul of married life, so of you wish to throw something at my head, kindly ask my permission first."—Buen Humor, Madrid.

"WOMEN CAN BE CHARMING AT ALMOST ANY AGE"

says Frances Starr

"Of course I am 39," says Frances Starr, famous stage and screen star. "Years matter so little nowadays if a woman knows how to guard complexion loveliness."

"Every actress knows that regular care with Lux Toilet Soap will do wonders for her skin. I use it regularly."

Of the 694 important Hollywood actresses, including the all stars, 699 use this fragrant white soap! You will want to try it—at just 10¢, a cake!

"I'm 39—"

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET FEEDER
Author of
"The Splendid Folly," "The Herald of War," "The Road to London," "Hodder & Stoughton, Ltd., London."

CHAPTER XXXIX—Continued.

And then Jean found herself resting against the curve of Blaise's arm, with the roan's powerful shoulders, firm and solid as a rock beneath her. "All right?" queried Blaise, gathering up the reins in his left hand. "Lean well back against my shoulder. There, how's that?"

"It's like an arm-chair."

He laughed.

"I am afraid you won't say the same by the end of the journey," he commented ruefully.

But by the end of the journey Jean was fast asleep. She had "leaned well back" as directed, conscious, as she felt the firm clasp of Blaise's arm, of a supreme sense of security and well-being. The reaction from the strain of the afternoon, the exhaustion consequent upon her flight through the mist and the fall which had so suddenly ended it, and the rhythmic beat of Orion's hoofs all combined to lull her into a state of delicious drowsiness. It was so good to feel that she was right, and to scheme, and plan no longer, to feel utterly safe . . . to know that Blaise was holding her . . .

Her head fell back against his shoulder, her eyes closed, and the next thing of which she was conscious was of being lifted down by a pair of strong arms and of a confused murmur of voices from amongst which she hastily distinguished Lady Anne's heartfelt, "Thank God you've found her!" And then, characteristically practical, "I'll have her in bed in five minutes. Blankets and hot-water bottles are all in readiness."

It was the evening of the following day, Jean, tucked up on a couch with her strained ankle comfortably bandaged, had been reluctantly furnishing Blaise with the particulars of her experience at the bungalow. She had been very unwilling to confide the whole story to him, fearing the consequence of the Tormarin temper as applied to Burke. A violent quarrel between the two men could do no good, she reflected, and would only be fraught with unpleasant results to all concerned—probably, in the end, securing a painful publicity for the whole affair.

Fortunately Blaise had been out when Judith had rung up earlier in the day to enquire if Jean had returned to Staple, or he might have fired off a few candid expressions of opinion through the telephone. But now there was no evading his searching questions, and he had quietly but determinedly insisted upon hearing the entire story. Once or twice an ejaculation of intense anger broke from him as he listened, but, beyond that he made little comment.

"And—and that was all," wound up

Jean. "And anyway, Blaise"—a little anxiously—"it's over now, and I'm none the worse except for the acquisition of a little more worldly wisdom and a few kinked ankles."

"Yes, Blaise," he said, standing looking down at her with a curious gleam in his eyes. "But that sort of thing shouldn't happen twice. You'll have to marry me—do you hear?"

"You shall never run such a risk again. We'll get married at once!"

"And Jean with a quiver of amusement at the corners of her mouth, responded meekly:

"Yes, Blaise."

The next minute his arms were around her and their lips met in the first supreme kiss of love at last acknowledged—of love given and returned.

There is no gauge by which those first moments when two who love confess that they are lovers may be measured. It is the golden, timeless space when "tomorrow tomorrow and dead yesterday" cease to hem us round about and only love, and love's ecstasy, remain.

To Blaise and Jean it might have been an hour—a commonplace period ticked off by the little silver clock upon the chimney-piece—or half eternity before they came back to the recollection of things mundane. When they did, it was across the kindly bridge of humor.

Blaise laughed out suddenly and boyishly.

"It's preposterous!" he exclaimed. "Quite forgot to propose."

"You did? Suppose"—smiling up at him impudently—"suppose you do it now?"

"Not if I won't waste my breath when I might put it to so much better use in calling you beloved."

Jean was silent, but her eyes answered him. She had made room for him beside her, and now he was seated upon the edge of the Chesterfield, holding her in his arms. She did not want to talk much. That still, serene happiness which lies deep within the heart is not provocative of garrulity.

At last a question—the question that had tormented her through all the long months since she had first realized whither love was leading her, found its way to her lips.

"Why didn't you tell me before, Blaise?"

His face clouded.

"Because of all that had happened in the past. You know—you have been told about Nesta—"

"Ah, yes! Don't talk about it, Blaise," she broke in hastily, sensing his distasteful recoil from the topic.

"I think we must a little, dear," he responded gently. "Yes, see, Nesta was not all to blame—nor even very much, as I'm sure"—with a little half-tender smile—"my mother tried hard to make you believe."

Jean nodded vigorously.

"She did. And I expect she was perfectly right."

He shook his head.

"No," he answered. "The fault was really mine. My initial mistake was in confusing the false fire with the true. It was not love I had for

Nesta. And I found it out when it was too late. We were poles apart in everything, and instead of trying to understand her and to lead her into our ways of looking at things, I only stormed at her. It roused all that was worst in me to see her trailing our name in the dust, throwing her dignity to the winds, craving for nothing other than amusement and excitement. I'm not trying to excuse myself. There was no excuse for me. In my way, I was as culpable and foolish as she. And when the crash came—when I found her deliberately entertaining in my house against my express orders, a man who ought to have been kicked out of any decent society, why, I let go. The Tormarin temper had its way with me. I shall never forgive myself for that. I frightened her, terrified her. I think I must have been half mad. And then well, you know what followed. She rushed away and, before anyone could aid her or help her, she had killed herself—thrown herself into the Seine. Quite what happened between leaving here and her death we were never able to find out. Apparently her marriage with me, her sister had gone to Paris, unknown to her, and had taken a situation as 'dame de compagnie' to some Frenchwoman, and Nesta, though she followed from Italy to Paris, failed to find her there. At least that is what Margherita Valdi told me in the letter announcing Nesta's death. Then she must have lost heart. So you see, morally I am responsible for that poor, reckless child's death."

"Oh, no, no, Blaise! I don't see that"—pitifully.

"Don't you? I do—very clearly. And that was why, when I found myself caring for you, I tried to keep away."

He felt in his pocket and produced a plain gold wedding-ring. On the inside were engraved the initials "B. T. and N. P.," and a date. "I'm glad."

"That was my tallman, Margherita sent it back to me when she wrote telling me of Nesta's death. When ever I felt my resolution weakening, I used to take it out and have a look at it. It was always quite effective in thrusting me back into my proper place in the scheme of things—that is, outside any other woman's life."

There was an inexpressible bliss in his tones, and Jean drew a little nearer to him, her heart overflowing with compassion. He looked down at her and smiled a thought ironically.

But now—you've beaten me. His lips brushed her hair. "I'm glad to be beaten, beloved. . . . I knew, that day at Montevaux, what you might come to mean to me. And I intended never to see you again, but just to take that one day for remembrance. I felt that, having made such an utter hash of things, having spoiled one woman's life and been, directly, the cause of her death, I was not fit to hold another woman's happiness in my hands."

Jean rubbed her cheek against his shoulder.

"I'm glad you thought better of it," she observed.

"I don't know, even now, that I'm right in letting you love me—"

"You can't stop me," she objected.

He smiled.

"I don't think I would if I could—now."

Jean leaned up, and with a slender, dictatorial finger on the side of his face, turned his head towards her.

"Quite sure?" she demanded suddenly. Then, without waiting for his answer: "Blaise, I do love your chin—it's such a nice, square, your-money-or-your-life sort of chin."

Something light as a butterfly, warm as a woman's lips, just brushed the feature in question.

He drew her into his arms, folding them closely about her.

"And I—I love every bit of you," he said hoarsely. "Body and soul. I love you! Oh! Heart's beloved! Nothing—no one in the whole world shall come between us two ever again!"

CHAPTER XXX.

The Gateway

August seemed determined to justify her claim to be numbered amongst the summer months before making her exit. Apparently she had repented her of having recently yelled the country in a mist that might have been regarded as a very creditable effort even on the part of November, for today the sun was blazing down out of a cloudless sky and scarcely a breath of wind awayed the nodding cornstalks, heavy with golden grain.

Jean, her strained ankle now practically recovered, was tramping along the narrow footpath through the cornfield, following in Blaise's footsteps, while Nick brought up the rear of the procession. She had not seen Blaise since her engagement had become an actual fact, though a characteristically warm-hearted little note from the latter had found its way to Staple, and this morning Jean had declared her inability to exist another day "without a heart-to-heart talk with Claire."

Hence the afternoon's pilgrimage

You said it! it pays to "ROLL YOUR OWN" with..

Thousands of delighted smokers say it because they have proved it, time and time again. You can roll at least 50 cigarettes with a 20c. package of Turret Fine Cut cigarette tobacco. And every cigarette you roll will be to your liking. The more you roll, the more you'll enjoy them.

15¢ and 20¢ packages
—also in 1/2 lb. vacuum tins

FREE Chanticleer Cigarette Papers with every package.

TURRET

FINE CUT

Cigarette Tobacco

across the cornfield which formed part of a short cut between Staple and Charnwood.

At first Jean had feared lest her new-found happiness might raise a barrier of sorts between herself and Claire. The contrast between the respective hands that Fate had dealt them was so glaring, and the rose and gold with which love had suddenly decked Jean's own life seemed to make the bleak tragedy which enveloped Claire's appear even darker than before.

But Claire's letter, full of a quiet, unselfish rejoicing in the happiness which had fallen to the lot of her friend, had somehow smoothed away the little uncomfortable feeling of comparison which, to anyone as sensitive as Jean, had been a very real embarrassment. Nick's felicitations, too, had been tendered with frank cordiality and affection, and with a delicate perception that had successfully concealed the sting of individual pain which the contrast could hardly fail to have induced.

So it was with a considerably lightened heart that Jean, with her escort of two, passed between the gates of Charnwood, and avoiding the lengthy walk entailed by following the windings of the drive, struck off across the velvet lawns—smooth stretches of close-cropped sward which, broken only by branching trees and shrubbery, and undisturbed by the dreariness of formal symmetrical flower-beds, swept right up to the gravelled terrace fronting the windows of the house itself.

The two men loitered to discuss the points of a couple of young spaniels rolling together on the grass, but Jean, eager to see Claire, smilingly declined to wait for them, and, speeding on ahead, she mounted the short flight of steps leading to the terrace from the lower level of the lawn.

(To Be Continued.)

Build Huge Telescope

Second Largest Telescope in the World To Be Erected Near Toronto

Details of the erection near Richmond Hill, north of Toronto, of the second largest telescope in the world, at an estimated cost of \$500,000 has been made public.

Officials of the University of Toronto to which Mrs. Jessie Dunlop is donating the David Dunlop Observatory in memory of her husband, announced construction would start at once on the two main buildings of the plant.

On a circular platform 800 feet above sea level, a round building 61 feet in diameter will be built to house the huge telescope, nearly all parts of which are being made in England. Larger than the one in the Dominion Government Observatory, Victoria, B.C., the telescope will be on the reflecting type and will have mirrors weighing 5,000 pounds.

The telescope building and an administration building to be erected at a cost of \$125,000, will be located in the corner of a 17-acre plot, which will be known as the David Dunlop Park.

Counterfeit Coin

Spurious Fifty Cent Pieces Being Circulated At the Coast

The 50 cent piece is in a fair way to pass out of use as legal tender in Vancouver until the flood of counterfeit coins of that denomination is stopped.

One large corporation is stated by police to have taken in more than \$100 worth of the spurious money, while other firms report acceptance of sums ranging from \$50 to \$500.

A number of persons detected passing the coins have been questioned by police, but in each case it was obvious they had accepted them innocently. Several months ago a spurious 50-cent piece of silver manufacture, bearing the date 1919, was found in circulation, and Royal Canadian Mounted Police succeeded in arresting and convicting the counterfeiter.

Within a short time, however, coins bearing the dates 1916, 1917, 1918, and of lesser value disguise, appeared and have gained wide circulation.

Will Not Reveal Secret

J. D. Ames, retired marine engineer, of Houston, Texas, has turned his hobby into a money-making industry, in spite of present economic difficulties. Ames makes small ships and inserts them in quart bottles. He will not reveal his secret of constructing the models in the bottles, but he is able to sell all he can build.

France has 800 manufacturers of agricultural implements, about twice as many as before the war.

Little Helps For This Week

"We then that are strong ought to bear the infirmities of the weak." — Romans xv. 1.

Ask God to give thee skill in comfort's art. That thou mayst consecrated be, Unto a life of sympathy. For heavy is the weight of ill in every heart! And comforters are needed much, Of Christ-like touch.

— Anna E. Hamilton.

They who have undergone and overcome stand with their keys to open the portals of life's great emergencies to their brethren. The wondrous power of experience! And see how beautiful and ennobling this makes our sorrows and temptations. Every stroke of sorrow that issues into light and joy is God putting into your hand the key of that sorrow, to unlock it for all the poor souls whom you may see approaching it through all your future life. It is a noble thing to take that key and use it.

— Phillips Brooks.

Persian Balm tones and stimulates the skin. Fragrant as a flower. Cool as morning dew. Safeguards and beautifies the most delicately-textured skin. Creates complexions of exquisite charm. Adds a noble finish to the faintest woman. Invaluable for softening the hands and making them faultlessly white. Cool and refreshing. Delicately fragrant. Delightful to use. Chosen unhesitatingly by all women who care for feminine distinction.

Things Not Needed

Rt. Hon. Stanley Bruce would exclude from the Empire "certain foreign products." An exchange suggests that the list include German measles, Chinese puzzles, Russian Reds, Spanish 'flu, French leave and Dutch treats.

Only two British women, of the 200 women pilots licensed in this country, have been killed while in charge of an aeroplane, states the Royal Aero Club.

Algiers and France have just been connected by radio telephone.

"Buha," made from dates, has become the national drink of Libya.

Heat is Hard on Babies!

But Mothers Find Protection and Relief for Them in BABY'S OWN TABLETS

"When my children are overtired and restless in warm weather, I give them their dose of BABY'S OWN TABLETS at night, and in the morning they are happy and contented children and are a pleasure to cope with," writes Mrs. Mary Mason, Halifax, N.S.

Mrs. George H. Walker, Thomburg, Ont., says: "I have found BABY'S OWN TABLETS the best of all children's remedies for Summer Complaint, Colic, Teething and Constipation."

"BABY'S OWN TABLETS are excellent."

DR. WILLIAMS'

BABY'S OWN TABLETS

Makes and Keep Children Well—As Mothers Know

lent for children's summer complaints," writes Mrs. (Rev.) Conzon, Bramford, Ont.

BABY'S OWN TABLETS can be given with complete safety to the youngest and most delicate child—see analyst's statement in each 24c package. They are recommended for summer illnesses, teething troubles, simple fevers, colic, upset stomach, constipation, sleeplessness and fretfulness. Children take them as eagerly as they eat candy. More than 1,250,000 packages sold in 1931.

Want Wednesday Half-Holiday Continued-Throughout The Year

The following petition will be placed before the Council at the next regular meeting.

We, the undersigned, in business in the Village of Crossfield, do hereby petition the Council to amend By-Law No. 59, section 2, so that Wednesday afternoon in each week during the year be held as a public holiday, with the same reservations for necessitous business as already existing under the By-Law above mentioned.

We, the petitioners feel that no hardship will be entailed by anyone on account of this regular half-holiday in each week, while it will be of great benefit to many.

Board of Trade Notes

1. Have you seen the New Sign Board south of town?
2. See the advertising done by our local business men.
3. A good town means a good district.
4. Buy at home, it not only helps the town but also the district.
5. Leave your dollars where they will do you the most good—patronize your local merchant.
6. The Board of Trade is working for the district both day and night.
7. In becoming a member of the Board you are working for your own interests.
8. If you are not a member, join now.
9. Don't forget the School Fair is sponsored by the Board of Trade.

The Hook Sign Co. are doing a very excellent job of painting on the Board of Trade sign board, but there has been altogether too many delays and it is high time it was completed.

Farmers in the Crossfield district are especially warned that tumbling mustard is increasing in the district in an alarming manner. So far it is found along fence rows and field corners and not to any great extent in the crop.

Odd patches should be pulled and burned now before they break away and scatter millions of seeds over other fields.

Abernethy Notes

Miss Margaret and Miss Anna Robertson entertained at tea last Thursday at the Ranch for the members of the Abernethy Girls Softball team and their friends.

The Sunshine girls softball team met the Abernethy girls in an interesting game on Tuesday night on Robertson's diamond. These teams are evenly matched; but unfortunately the game had to be called at end of the fifth inning on account of darkness, the score being 11-7 in favor of Abernethy.

The players were:
Sunshine: M. Brandon, O. Stauffer, M. Stauffer, F. Cameron, L. Michel, P. Stauffer, C. Michel, Mrs. Fieldhouse, M. Brandon.
Abernethy: E. MacKenzie, M. Willis, R. MacKenzie, D. Willis, Mrs. Morrison, A. Robertson, B. Gallelli, H. Gallelli, M. MacKenzie.

Tennis Notes

Mr and Mrs. T. Goldie, Mr. and Mrs. A. Stevens, F. Mossop, Miss Goldie and Gavin Goldie, journeyed to Olds on Wednesday afternoon and were successful in winning five of the nine matches played.

The tournament to have been held last week-end with Red Deer will be played on Sunday.

HAIL STORM HITS HARMATON AREA

OLDS, Aug. 22.—One of the worst storms in the memory of old timers visited this district south of Harmatton, 15 miles southwest of Olds, Friday night, when 3-4 inches of water fell in less than two hours. The storm was accompanied by hail which did 100 per cent damage where it fell. Dog found rose 12 feet in a few hours, destroying the bridge at Heaton. On English Creek trees a foot and a half thick were uprooted.

Ed Morgan who lives on the creek, lost 100 head of hogs, a team of horses, two cattle and outbuildings. Mr. Keys lost two horses, two cattle and several hogs. Hatched lost a team of horses, hay stacks, straw piles and small buildings close to the creek were taken.

Baseball Tournament Called Off

Owing to the heavy rain storm on Friday night which was general throughout the district, it was necessary to postpone the Bush League tournament to have been held here on Saturday.

It will be impossible to hold the tournament this year, as harvest has started in parts of the district.

The visit of the Red Deer tennis players on Sunday was also postponed owing to wet grounds.

Local and General

If you want to enjoy a good laugh, ask Frank Brown about his friend the Matador.

One thousand tons of hay have been put up this year at the Colclutt Ranch.

Mel Patmore is now ready for business in his service station in the former Massey-Harris building on Main Street. He has installed one pump and is selling Turner Valley gas. We understand he will put in two more pumps and intends handling Imperial oil and two different grades of Turner Valley gas.

Since printing the prize list the management of the Palace Theatre have donated six passes to the theatre for some of the winners at the School Fair. It will be left to officers of the Fair to place these passes.
